## DETAILED ACTION

Claims 1-41 are pending in the present application, and they are subjected to the following species restrictions.

### ***Species Election/Restrictions***

A. This application contains claims directed to the following patentably distinct species of conditioning body tissue of the claimed invention:

***A specifically named conditioning as recited in the Markush group of claim***

**14.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1-14 and 21-41 are generic.

Additionally, should Applicants elect mechanical conditioning as the species, this application contains claims directed to the following patentably distinct species of mechanical conditioning of the claimed invention:

***A specifically named applied force as recited in the Markush group of claim***

**20.**

B. This application contains claims directed to the following patentably distinct species of a body tissue of the claimed invention:

***A specifically named body tissue as recited in the Markush group of claim***

**12.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-41 are generic.

C. This application contains claims directed to the following patentably distinct species of a biological material of the claimed invention:

***A specifically named biological material as recited in the Markush group of claim 13.***

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1-29 and 31-40 are generic.

D. This application contains claims directed to the following patentably distinct species of a donor animal of the claimed invention:

***A specifically named mammal as recited in the Markush group of claim 10.***

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-41 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang Nguyen, Ph.D., whose telephone number is (571) 272-0776.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's mentor, David Guzo, Ph.D., may be reached at (571) 272-0767, or SPE, Irem Yucel, Ph.D., at (571) 272-0781.
